

DAC-300

Ultra Fine Dry Mold Shield Rust Preventative

Why was ULTRA FINE DRY MOLD SHIELD developed?

Ultra Fine Dry Mold Shield was developed to give you total control of rust and corrosion along with acid vapor neutralizing. Our unique 3 way volume control spray tip allows you to DIAL IN ON COVERAGE control and decide just how much to spray. This effective fine mist evenly coats molds without causing bleeding or leeching. Excellent on PVC tools. Removal is a cinch.

PERFORMANCE CHARACTERISTICS:

- Won't leech, run or cause more bleeding
- Nice fog for evenly coated molds
- Semi-transparent coverage
- Helps eliminate pitting that results from the electrolysis effect between molds
- Prolongs the formation of corrosion between molds

DIRECTIONS:

Simply DIAL IN the coverage control with the adjustable spray tip and cover the entire mold. To remove: Simply use DAC-103 or DAC-205, or DAC-353.
